INCIDENT REPORT
.COM.AU

IncidentReport.com.au
- Create your own incident reporting enabling customisation any way you want It

Incident Reporting Software

Manage incidents more effectively with an incident report system to capture incidents that occur in real time and then follow them through with a Hazard Report, Corrective Action, Investigation, Risk Assessment, Safety Observation and even create your own forms and processes.

- **Report Incidents online in real time as they occur**

- **Follow them up with hazard reports, investigations, corrective and preventative actions and tasks**

- **Reporting on all aspects of incidents and activity**

Create your own Incident Report Forms

No more need to change your needs to suit your software. Create your own incident reporting software from scratch specific to your needs or use our ready to go templates and customise from there!

Benefits and features include:

- Meet auditing requirements and legislative obligations
- Be able to provide in a heart beat a report of all incidents filtered by any type, company or category to auditors

- Corrective Actions
- Safety Observations
- Preventative measures
- System Alerts, Reminders and Schedule
- Document Management, Sharing, Repository and database for searching
- Dashboard of live real time analysis by site, state, group
- Hazard Registry
- Risk Registry
- Help Desk options
- Escalation and assigning to other staff, contractors or third parties
- Commenting by other managers
- Entirely personalsied advanced comprehensive reporting

iPhone Apps:

Incident Reporting App
Perfect for something simple for users to submit the basics of incidents in a real time scenario as they witness or are involved with in the field. Includes capturing a photo of the incident using the iPhone camera. Fill out a more comprehensive report via the main web system once you receive the Incident Report from the app.

Hazard Reporting App
Perfect for something simple for users to submit hazards in a real time scenario as they encounter them in the field. Fill out a more comprehensive report via the main web system once you receive the Hazard Report from the app.

Safety Observation App
Collect general observations from staff, contractors or visitors
